

Assembly Directions

1. Print out this measuring tape template.

2. Cut out the measuring tape pieces using a pair of scissors.

3. Assemble the measuring tape.

Note your settings when you print. If you have "fit to page" selected, the pages will be shrunk to fit your printer's margins, and the measurements will be incorrect.

Do not cut off the sections labeled "glue or tape here".

Using a glue stick or tape, affix the second section of the tape to the first. Overlap the sections so the entire shaded "glue or tape here" areas are completely covered.

Wait till glue is dry before using.

The logo for Phanflex, featuring the brand name in a stylized, handwritten-style font with a registered trademark symbol.
